

Build A Bus Home (BABH)

Volunteers Covid-19 Protocol

If you are in any way unwell, please stay home. Call Lisa Gillotti 360-544-2677 and let her know.

Screening prior to shift:

Temperatures of each volunteer will be taken prior to shift starting. If temperature is above 100 (or the latest CDC number), we will excuse you from service. We will also be checking in with each volunteer about other COVID-19 symptoms. If we determine a volunteer is symptomatic, we will refer them to the local clinics to be checked. (Hawkes Prairie Providence Drive thru testing)

Volunteers will be provided with PPE, a face mask, gloves, a disposable smock (possible), and Briotech disinfectant at the beginning of their shift.

Before your shift:

Wash your hands.

Check in with screening

Receive your free bottle of Briotech for use on shift

Spray hands with Briotech

Put on the smock (possible), (remove during breaks)

Put on new, clean gloves

Put on your mask. Only touch your mask on the side edges or straps.

BrioTech eradicates viruses, bacteria, and fungi, and kills HIV, Ebola, Coronavirus, and HPV. It also kills the spirochete that causes syphilis and the bacterium that causes gonorrhea.

Please note that gloves are not made to withstand hand soap, so washing gloves rather than changing gloves can create inconsistencies in the material of the gloves and make your hands less protected.

We will provide safe protective masks for Volunteers. We have single use masks and reusable masks. The reusable ones are doubly lined and are washable. Do not touch the mask front, only touch the side edge or straps or elastic when putting on the mask and taking it off. The masks have metal in them to secure over the nose, only touch the bridge of your nose to secure it. At the end of your shift, put your reusable mask in a paper bag to be taken home and laundered. (Machine wash, air dried)

After your shift:

Remove your mask, touching only the sides and straps, and place in a clean paper bag and leave at the welcome tent.

Remove your smock and gloves and place them in the trash

Wash your hands before leaving for the day.

Volunteers Covid-19 Protocol

Phones are one of the biggest vectors for spreading germs. If you use your phone spray your hands with Briotech before and after use. We recommend you put your phone and your personal items in our designated safe area in bags provided. If you keep your phone with you remove your gloves before use. When you return, wash your hands, put on new gloves and your mask and smock, and only handle your mask on the side edge or by the straps. If you take your mask with you on break or to use a phone, make sure you handle it the same way.

Food should NOT be eaten in the trailer area. **Bring your own water bottle as water will be provided. Food will not be provided.** If you need to eat, bring your own food. and during your shift, remove your mask and gloves, and use your vehicle as your eating area. When you return, wash your hands, put new gloves on and only handle your mask on the side edge or by the straps.

The showers will be cleaned between guests and the showers will be disinfected for a 10-minute period after cleaning for maximum effectiveness against germs, viruses and bacteria.

Items provided: gloves, smocks (if available), masks, Briotech spray bottles, draw string bags, water, and a safe area for volunteers' personal items.
